

THE BROWSER EXTENSION

Coach every sales conversation — right where it happens.

ELOSTATE Sales Coach is a browser extension that puts an AI sales coach on the conversation you're *already* looking at. Reading a prospect's reply in Gmail, WhatsApp, LinkedIn or Slack? Click the icon and — without leaving the thread — read the room, grade your draft against the sales playbook, catch up on where the deal stands, or have the next message drafted for you.

What it is

A lightweight browser extension. No new app to learn — it works on the sites your reps already sell in.

What it's for

Turning a real, live conversation into a coached one — in the moment, before the reply is sent.

How it works

It reads the open thread on the page, sends the text to your ELOSTATE workspace, and shows the coaching in a panel.

SEE IT IN ACTION

WHATSAPP · PROSPECT — "DANA @ NORTHWIND"

Thanks for the demo! Honestly the price came in higher than we'd budgeted for this quarter.

Totally understand, Dana. Can I ask — is it the total number, or the timing within the quarter?

Bit of both. My CFO will want to see the ROI before signing off.

Say it for me

WHAT'S WORKING

- You isolated the objection (number vs. timing) instead of discounting.

THE OPPORTUNITY

Dana named the real buyer — the CFO — and the real gate: ROI. Shift from price to proof.

NEXT MOVE

Offer a one-page ROI framed to the CFO; anchor to their budgeted number, not yours.

| What outcome would make your CFO call this a win by Q3?

ELOSTATE Sales Coach

LIVE COACHING · GROWTH REVIEWS

FIVE TOOLS · ONE CLICK AWAY

Everything a rep needs, **on the conversation itself.**

Read the room

01

What's working, the real opportunity, and the next move — read from the thread as it stands.

Coach my reply

02

Paste your draft. It grades it against the sales books (SPIN · Challenger · Voss) and hands back a stronger version — with the *why*.

Catch me up

03

Where this deal stands — the state, the open objection, the next step — in a two-line brief.

Draft my reply

04

Drafts the next message for you and names the sales move it used, so you learn while you send.

Say it for me

05

Tell it what you want to get across in plain words — it shapes that intent into a strong, ready-to-send message.

WHERE YOU CAN USE IT

17 platforms auto-read — **plus any site by highlight.**

How to use it

1

Install it

From your ELOSTATE dashboard → *Browser extension*, download the package and unzip it. On `chrome://extensions`, turn on *Developer mode* and click *Load unpacked*. (A one-click Chrome Web Store install is coming.)

2

Pin it & sign in

Pin the Sales Coach icon to your toolbar. Click it on any page and press *Sign in* — it connects to your workspace in one click.

3

Open a conversation

Open a real thread — Gmail, WhatsApp Web, LinkedIn, Slack, or any of the 17 supported platforms. On other sites, just highlight the messages.

4

Click the icon → pick a tool

The panel reads the thread and previews what it captured. Choose *Read the room*, *Coach my reply*, *Catch me up*, *Draft my reply*, or *Say it for me* — and copy the result straight into your reply.

Coach the deal before you hit send.

Available now for your team — find it under “Browser extension” in the Sales Coach sidebar.

Private by design

The extension reads only the conversation you have open, only when you ask it to. Nothing is captured in the background, and the coaching tools process that text without storing it. Your workspace plan controls access.
