

EloState AT&T Fiber Pitch Scoring Rubric

2026-09-19 · @Someone

Overview

Every recorded pitch gets a Pitch Score: a 100-point base score for how well the rep ran the pitch, plus up to 30 bonus points, minus violations. The score measures training inputs only; sales outcomes are not scored.

Component	Range	What it measures
Base score	0 to 100	Pitch phases, transitions, and delivery skills
Bonus	0 to +30 (capped)	Rapport, positioning, buying signals, product add-ons
Violations	Negative, uncapped	Talking over, talking too much, too few questions, rudeness

The existing coaching letter grade stays as the coaching view. The Pitch Score is the competition currency and feeds Vault.

Grading method

The AI grades each element on intent, not wording. Reps do not need to follow the script word for word; the major point has to land.

Grade	Credit	Meaning
Hit	Full points	Point clearly made, in any wording
Partial	Half points	Rushed, vague, or only implied
Missed	0	Skipped

The following are variable and must never be graded for accuracy, only for whether the point was made:

- Customer bill and speed numbers (differ per household)

- Promo prices, speed tiers, and offers (change over time; script values are placeholders)
- Timeline claims such as when trucks arrive or when lines were run
- The customer's current provider (the rep adapts if it is not Xfinity)

Base score (100 points)

Six categories add up to 100: Introduction 12, Discovery 16, Consulting 14, Close 15, Transitions 8, Delivery 35.

Introduction phase (12 pts)

Element	Pts	Point that needs to land
Trucks / neighborhood notice	3	Crews will be working in the neighborhood
Who and what	3	AT&T Fiber, connecting the neighbors
What we've done	3	Old lines out, new fiber in
Why we're here	3	Neighbors unhappy with price and/or speed

Discovery phase (16 pts)

Element	Pts	Point that needs to land
Internet usage	4	Asked, with a follow-up on the answer
Current speeds	2	Asked before the speed test
Speed test	4	Run live; calling the number before it appears is required for the full 4
Current bill	3	Got a dollar figure
Pain amplifier	3	Made the customer feel the cost over time

Consulting phase (14 pts)

Element	Pts	Point that needs to land
Shared vs. dedicated	4	Why current service slows down and fiber does not
Hot buttons	4	Pitch tied back to the customer's usage answers
Checklist: speed	2	Current speed vs. fiber speed
Checklist: price	2	Current bill vs. new price
Checklist: equipment	1	Equipment included
Checklist: install	1	Install fee waived

The close (15 pts)

Element	Pts	Point that needs to land
Catch: qualification	3	Credit check framed; customer confirms they pay on time
Catch: deposit	3	Deposit framed as going toward the first bill
Simple close	3	Reserving the tech slot, with demand urgency
Options close	3	Morning vs. afternoon choice
Into paperwork	3	Moves straight to qualifying without hesitation

Transitions (8 pts)

Transition	Pts	What the AI listens for
Intro to Discovery	2	A bridge such as "let's see if this even makes sense"
Discovery to Consulting	2	Pivot from the customer's numbers into the explanation
Consulting to Close	2	Checklist tie-down into the catches

Transition	Pts	What the AI listens for
Close to Qualify	2	Time slot locked, then straight into customer info

A hard, awkward jump between phases earns partial credit. No transition earns 0.

Delivery (35 pts)

Skill	Pts	What it measures
Objection handling	8	AI-detected: acknowledge, isolate, answer, return to the close
Talk / listen balance	7	Customer gets real airtime
Tone and certainty	7	Confident and conversational; no drop-off when thrown a curveball
Question quality	5	Open questions and follow-ups beyond the scripted three
Spoken "yes" at hinge moments	4	Pauses for agreement instead of rolling through
Pace	4	Not rushed, no dead air

If no objection occurs, the other delivery skills are scored out of 27 and scaled to 35. A smooth pitch is not penalized, and avoiding objections earns no free points.

The app's existing Questions and Closing skill scores are covered by Discovery and Close and must not be counted a second time.

Bonus points (cap +30 per pitch)

Bonuses reward the behaviors that separate good reps from great ones. All are detected by the AI from the recording; none come from rep self-reporting.

Bonus	Pts	Detection notes
Gets inside the house or backyard	+5	Inferred from audio; see below. Counts whether the rep was invited or assumed their way in

Bonus	Pts	Detection notes
Pitches DIRECTV	+5	An actual pitch, not a passing mention
Pitches AT&T Wireless	+5	Same standard
Pitches ADT	+5	Same standard
Referral / next-door walk	+5	Customer names a neighbor or walks the rep over
Non-decision-maker save	+4	Firm return time plus something left behind for the decision maker
Icebreaker / tactical empathy	+3	Genuine personal connection before the pitch
Customer laughs	+3	Once per pitch
Customer pulls up their bill or account	+3	Customer opens their bill, app, or account during the pitch
Hard follow-up set	+3	Exact time, confirmed. "Maybe like 6:00" does not qualify
Neighbor hook with real names	+2	Specific neighbors or addresses, not "your neighbors"
Customer states the pain in their own words	+2	Customer, not the rep, describes the problem
Buying questions	+2 each, max +6	e.g. "When can you install?", "Is there a contract?", "What about my TV?"

Inside / backyard detection

The AI infers location from the conversation and ambient audio:

- Verbal cues: "come on in," "let's go out back," "have a seat"
- A door opening or closing mid-conversation
- Acoustic change from outdoor sound (wind, traffic) to indoor sound (room echo, TV, appliances), or into a backyard setting

Award the bonus only above a confidence threshold, and let managers override when a rep disputes a result.

Violations

Violations target bad pitching habits and are deducted after base and bonus are added.

Violation	Deduction	Trigger
Rude, dismissive, or condescending to the customer	-10	Any instance; flag for manager review
Talking too much	-5	Rep talk share above ~75% for the full pitch, or a monologue over ~90 seconds with no customer input
Not asking enough questions	-5	Fewer than 3 discovery questions before the checklist
Talking over the customer	-2 each, max -6	Rep cuts in while the customer is mid-sentence
Ignoring a customer question	-2 each	Customer asks something and the rep moves on without answering

Talk/Listen and Question Quality already cost points in Delivery. Set violation triggers at clear extremes so a slightly talk-heavy rep loses a few Delivery points without being penalized twice.

Competition rules and scoring formula

$$\text{Pitch Score} = \text{Base} + \min(\text{Bonus}, 30) - \text{Violations}$$

- **Qualifying pitch:** counts toward the leaderboard only if it reached the Discovery phase and scored at least 40 base points. Door slams do not drag down a rep, and junk recordings cannot be farmed for points.
- **Leaderboard metric:** total Pitch Score across qualifying pitches for the competition period, which rewards volume.
- **Best Pitch award:** separate prize for the highest single Pitch Score in the period.
- **Prize eligibility:** minimum of 5 qualifying pitches, matching the app's existing provisional threshold.
- **Floor:** a pitch cannot score below 0 on the leaderboard.

Implementation notes

- **Pitch reference:** the AT&T Fiber pitch (final draft) defines the phases and major points. Treat its numbers, prices, and timelines as placeholders.
- **Per-element output:** store a Hit / Partial / Missed grade plus a short evidence note (timestamp or quote) for every element, so reps and managers can see why points were awarded.
- **Objection handling:** detected by the AI from the conversation; no rebuttal script is required for scoring.
- **Partial pitches:** score every element reached; unreached elements score 0. The 40-point qualifying rule handles short pitches on the leaderboard.
- **Bonus detection:** all bonuses come from the recording, never from rep input. Apply a confidence threshold to audio-inferred bonuses (inside/backyard, laughs).
- **Manager override:** managers can adjust any bonus or violation, with the change logged.
- **Coaching grade:** keep the existing letter grade and skill scores in Debrief; the Pitch Score runs alongside it for competitions and Vault.
