

Pattern Interrupt

Repeated misses from the recordings, with the clips to prove it

Saturday, September 19, 2026

Patterns, not one-off mistakes. A pattern appears when the same miss shows up in 3 or more of a rep's last 10 pitches. Your manager sees this same page. Use the clips to hear it for yourself, then practice the fix in Role Play.

WHY IT MATTERS

Leading with a question hands the customer control before they know why you are at the door. His first few exchanges get tangled and the pitch wanders before it lands.

WHAT THE PITCH CALLS FOR

Lead with the notice, then the who and what: "Hey, how's it going? I'll be super quick. I just gotta let the neighbors know you're going to see a ton of our trucks out here."

"How long ago did you switch to fiber? What?"

Customer confused; the opener had to restart.
