

Home Page:

Put start knocking button at the bottom

On the Door Log page where it says Doors Today (Should be doors knocked), Sold, Go Backs put the **Next 5 door focus** underneath Doors, sold, gobacks

On that same page, take out See today's metrics, Undo Last

On Macro Mode when it is toggled on. Delete what's written underneath and change the explanation to, This mode is for short form sales, under 15 minutes. Fiber internet, Pest Control

Then when it's ON write "Long form sales, over 20 minutes, ex: Solar Sales.

After every pitch, they need to title it, label it sold, followup, Notinterested, etc. This should happen automatically. Right now its like this, see picture

Ready to record

15 recordings waiting to be sent

Start recording

Recording stays on this phone until it is sent, so you can record with no signal. Up to 109 minutes per call.

Take out today's performance (that's what the home page is)

On roleplay lets spell practising as "practicing" both are right, but americans use c over s.

Dashboards will be different for managers and reps since managers will be overseeing reps not recording. So we have to talk about manager dash after user is done
